2 JUL 1971

MEMORANDUM FOR: Director of Central Intelligence

SUBJECT : Items of Interest -- 17 June through 2 July 1971

Items of interest covering the period 17 June through 2 July 1971 are listed below,

25X1

Reversion

DD/S and FE officers have been working with all operating components concerned to finalize plans for Agency relocation actions made necessary by the . Completed plans will be submitted for senior Agency review and decision within 10 days.

25X1

Bureau of Public Roads Land

The General Services Administration divided the land declared excess by the Federal Highway Administration between National Park Service and the Agency as shown on the attached diagram. Although the result gave us less than we originally requested we decided against pressing hard for a different decision since the majority of our hard security-relatable worries were satisfied by the GSA action. Low key discussions with GSA give promise of some increase in the piece assigned to the Agency between West parking and the FHWA segment. The Agency and FHWA are given exclusive use of the present Parkway entrance while the Agency and FHWA are guaranteed use of the access road from Route 193. GSA noted to the Park Service the need for cooperation "with respect to necessary security for the CIA area, both in developing the property for park use and administering the park."

In the same connection, Mrs. Harriet Bradley, Dranesville member of the Fairfax County Board of Supervisors, introduced and got unanimous approval of a resolution opposing allocation of any of the land to the Agency or for any

use other than parking. We subsequently met with Mrs. Bradley and provided her with accurate information on Agency security needs and problems. Mrs. Bradley was appreciative and apologetic for having acted before consulting with us on the accuracy of information upon which she based her resolution. She assured us that she will not press this matter further but she felt it would be counterproductive to withdraw the resolution. Nevertheless, the County Executive, as directed by the Board, sent copies of the resolution to you and other officials asking assistance. A response is being drafted.

Garage Construction

Colonel White and I discussed with Mr. Charles Conrad, Executive Director, National Capital Planning Commission, the proposed garage construction and the importance of having the necessary review by the Commission handled in a manner to avoid publicity. Mr. Conrad expressed the belief that the Commission would agree to handle this matter in executive session and he further offered to assist in getting the required local Virginia planning authorities' agreement in a similarly quiet way. We also took advantage of Mr. Conrad's visit to brief him on our position regarding the excess FHWA property and to give him a tour of our compound and the FHWA land next door.

Security Review Committee (Executive Order 10501)

In the aftermath of the Pentagon papers disclosures two special meetings of the Security Review Committee set up in January 1971 under NSM 113 to review E.O. 10501 (security classification) were called. General Haig chaired the first on 29 June at which members were informed that the White House memorandum is forthcoming (not yet received) which requests each department and agency to provide by 10 July the numbers of employees, consultants and industrial contractors who hold Top Secret clearances and separate the numbers who hold compartmented clearances. Names are to be compiled by 31 July but retained by the agencies. On 1 July the President met with the same group and considerably expanded its charter to include recommendations on additional declassifications, reductions in clearances and classified materials, and new legislation. Because of its importance, a copy of the Memorandum for the Record on the 1 July meeting is attached.

MEMORANDUM FOR THE RECORD

SUBJECT: Security Review Committee Re NSSM-113

1. On 1 July the Security Review Committee established pursuant to NSSM-113 met with the President. Present were William Rehnquist, Department of Justice; Howard Brown, Atomic Energy Commission; Thomas Latimer, National Security Council; Joseph Liebling, Department of Defense; William Blair, Department of State; the undersigned plus Messrs. Ehrlichman, Haldeman, and Ziegler of the White House Staff.

2. Mr. Rehnquist briefed the President on the progress of the Committee under NSSM-113. The President said the group should expand its goals to include:

- A. Recommendations on declassifying the documents of World War II, Korean War, U-2 and the Cuban Crisis plus a proposed statement to the press concerning this action.
- B. Drastic reduction of TS clearances held within and outside Government.
- C. Major reduction of papers classified in the future.
- D. Proposed legislation to protect classified material.
- E. A new clearance for the most highly classified material.

GROUP 1
Excluded from automatic

SECRET

4. The President cited his own experience as an example of restricting classified information to persons out of Government. He said during his eight years out of office he made several overseas trips. He asked the CIA for briefings and was refused by Mr. Dulles and Mr. Helms. He remarked that he knew they did not make the decision but they were right.

5. The President directed the group to continue quietly with no publicity and with no deadline for completion of its task.

6. Mr. Rehnquist, Chairman of the Security Review Committee, has called a meeting on 6 July to map out the action necessary to comply with the President's instructions. 25X1

ITEMS FOR THE DIRECTOR'S BLACK BOOK

25X1

New Agency Garage

Money for the construction of the garage on the Headquarters site, to replace the temporary garage in [] has been transferred in the amount [] to GSA. Designs are in final drafting and are anticipated to be completed by the end of 1971. Final Agency comments on the architect's plans are ready for submission to GSA. Recent meetings with the National Capital Planning Commission (NCPC) officers, including Charles Conrad, Executive Director, have been profitable in providing NCPC with an explanation of the need for this facility. It is anticipated that the Agency will make the presentation of the garage to the NCPC using GSA in a supporting role. NCPC has offered to review the garage project in Executive Session if we so desire, and Mr. Conrad will give it his personal attention.

Federal Highway Administration (FHWA) Land Adjacent to the Headquarters Site

A continuous series of meetings and exchange of information have been taking place between DD/S officers and senior officials of GSA, NCPC, and FHWA. The latest letter from Douglas K. Kinsey, Commissioner of Property Management and Disposal Service, GSA, was received by Mr. Coffey on 28 June. The contents of the letter transfers approximately 115 acres to CIA. This is less than the amount indicated earlier as our required minimum. (It will provide a reasonable buffer zone for our present structures and will also provide protection for some possible future construction.) The letter went on to state that the 115 acres includes approximately 20 acres adjacent to the George Washington Memorial Parkway and about 32 acres comprising the Scattergood-Thorne Tract. The remaining acreage (approximately 60 acres) includes all of the West Parking Lot, the Heliport, and the space for parking official vehicles, totaling 21.9 acres. [] The map received with the letter is at variance with the latest understanding between Mr. Coffey and Mr. Kinsey. DD/S officers are again approaching GSA at Mr. Coffey's request to solicit clarification on these variations. [] The Agency's formal request for transfer of the approximately 115 acres has been drafted and will be forwarded to GSA as soon as the variations mentioned have been resolved.

25X1

MEMORANDUM FOR:
Acting Executive Officer, DD/S

SUBJECT : DCI Briefing Log

The following items of interest are set forth for possible use in the DCI Briefing Log:

1. A Washington Post article dated 17 June 1971 written by Staff Writer George Lardner, Jr., reflected that one Robert F. Cudak, age 29, a felon under complete judicial immunity, told the Senate Subcommittee how he and his confederates systematically stole \$100 million in valuables from "under the noses of Uncle Sam and the nation's airlines."

He said it was easy, even when the mail pouches contained "top secret" government documents. On about 20 occasions Cudak said he found himself in temporary possession of a wide variety of classified government documents, some belonging to the Department of Defense, the CIA and the FBI. Cudak said that neither he nor his accomplices "ever tried to move (sell) any of the "stuff" but looked at it out of curiosity."

He recalled one document with "some land-to-air ballistic missile plans and another on Cuban nationals in Miami from the FBI, full of 'informants' names and addresses."

SECRET

SECRET

The Senate Permanent Investigations Subcommittee is not through with Cudak, and later the Chief, Postal Inspector wants him for a few days so Cudak can testify before a New York Grand Jury.

The FBI has been given approval to interview Cudak and has estimated that it will be at least 30 days before the Subcommittee will be through with Cudak.

The FBI describes Cudak as "flaky," it being necessary for one of the postal inspectors to assist the Senate Subcommittee in the debriefing of Cudak since the Subcommittee was not getting much out of him.

A Special Meeting of the Security Committee of the United States Intelligence Board was convened on 18 June 1971 to take action on the Cudak disclosure. The DIA member reported informal contact with the Subcommittee ascertained that Cudak is more knowledgeable than reported in the newspapers. What was particularly alarming, according to DIA, was that Cudak said some of his associates could have sold the classified material in Canada. Cudak reportedly did not give them the material.

Damage assessments covering a four (4) year period beginning with July 1966 are currently being conducted by the Committee members with a tentative deadline of 2 July 1971 for their submission to the Security Committee Secretary.

The FBI will report the results of its interview of Cudak when the interview has been accomplished.

Depending upon the nature and extent of the security damage encountered, further security considerations by the Committee will follow.

As a matter of interest, it should be noted that Secretary Volpe, Department of Transportation, has sponsored the establishment of an interdepartmental committee on transportation security to work with State, Treasury, Commerce, Defense, Justice, General Services, SBA, ICC, Federal Maritime Commission and CAB to look into cargo thefts.

SECRET

SECRET

✓2. On 29 June 1971 an emergency meeting of the Security Review Committee (Executive Order 10501) was called at the White House and chaired by General Alexander M. Haig, Principal Assistant to Mr. Henry Kissinger.

General Haig stated that the President is disturbed over The New York Times and Daniel Ellsberg cases. To determine the extent of exposure to highly classified information, the White House will issue a memorandum requesting each department and agency to furnish:

- A. Number of Top Secret cleared employees, consultants, and industrial contractors;
- B. The number of compartmented cleared employees, consultants, and industrial contractors.

The deadline for submission of this material is 10 July 1971.

The names of the personnel cleared in the paragraph above are to be compiled by each agency by the end of July. This list is to be retained in each agency.

In addition to compiling the list, each department will be requested to initiate action to reduce the number of such cleared individuals. According to General Haig, the President is most concerned about the number of individuals cleared and receiving highly sensitive information in the "think tank" companies. 25X1

Action has been initiated to compile the information requested above.
